

K-Love, which is heard in our community on 88.9, 89.9 and 88.5, has a vital and positive impact on our community. The effect that LPFM would have on our community would be negative. There are very few FM radio stations that have a positive impact on a community, and that are "safe" for the entire family to listen to. This radio station is an invaluable service to our community and must continue in that role.
